

Ref:

Dear _____,

We are delighted to present our detailed quotation for the provision and installation of a renewable energy system at your property.

This quotation is comprehensive, including specifics on the proposed equipment, an estimated performance of the system, financial incentive information, and other pertinent details to help you make a well-informed decision.

Accompanying this quotation, you will find:

- Your Quotation;
- Your Contract, detailing our terms of business;
- Your full Performance Estimate;
- A Cancellation Form – in case you change your mind.

Before and During Installation:

- A 25% deposit is required upon acceptance of the quote.
 - If you are using our finance option, this is not required.
- We will order materials to our secure storage in preparation for installation.
- Scaffolding will be set up, potentially one week in advance. You may be contacted to coordinate a suitable time for access.
- An interim payment of 35% is due one week before the installation start date. Interim and final payments must be made by BACS transfer.
 - If you are using our finance option, this is not required.
- On the installation day, our team will retrieve the materials from storage and aim to arrive at your premises between 7:30 am and 10:00 am. Access to your consumer unit, loft, roof, and cable routes will be needed. Please note, the power may be off during installation for safety testing. Your presence is not required throughout the installation process

Unit 1A Foley Lodge, Chittleburn Business Park, Brixton, Plymouth, PL8 2PH

Simple Solar (SW) Ltd t/a Simple Solar. Company number: 13789220

Accreditations:

Post-Installation:

- Following completion and commissioning, final balance will become due.
- Once final payment has been received, your handover documentation and certification will be sent to you.
- Scaffolding removal will be arranged, usually within one week after installation.
- Any required DNO application or post-installation notification will be submitted to the relevant Distribution Network Operator.
- Your system will be registered with building control and the MCS database, with certificates sent to you.
- Registration with our approved warranty provider will be completed, and documentation sent to you.
- As part of The IAA's (The Installation Assurance Authority) regulation, random inspections are conducted on installations. Should yours be selected, we will organise a suitable inspection time, taking no more than 30 minutes.

Payments

Your deposit can be paid by debit/credit card or by BACS. All interim and final payments must be paid by BACS.

Please use the following bank details for BACS payments:

Name: Simple Solar (SW) Ltd
Sort Code: 09-01-30
Account No: 02759511

Please ensure all correspondence and documents are kept safe, as they may be required for property sales, SEG registration, or warranty claims.

Kind Regards

Ben Quick

Solar PV Quotation

Customer Name:		Project Reference:	
Installation Address:			
Quotation issued by:		Date issued:	

Description of Goods	Qty.	
Solar PV panels -		
Inverter -		
Switches, cables, hooks, mounting rail, consumables	1	
Batteries -		
Electric Vehicle charging station -		
Back up -		
Bird netting		
iBoost		
Immersion timer		
Optimisers		
Goods Total:		£
Description of Services	Qty.	
Scaffolding		
Installation	1	
Administration and warranties	1	
Services Total:		£
Goods & Services Sub Total:		£
Delivery costs:		£600.00
VAT:		£0
Total:		£
Our intention is to provide you with a full and clear cost for the installation. The quotation is based on the information available to us at the time it is prepared. If unforeseen remedial electrical or building work, planning or structural requirements, or additional work requested by you results in additional costs, these will be discussed and agreed with you before the additional work is carried out.		

Solar PV Quotation

Guarantees and Warranties		
Panels	30	Years
Inverter	10	Years
Workmanship	5	Years
Battery	10	Years
Optimiser	25	Years

Your equipment is guaranteed by its manufacturer, but you should contact us in the first instance if anything appears to be operating incorrectly.

In addition to the product guarantees, our work will be covered by a workmanship warranty. This workmanship warranty will be transferable to the new legal owner of the property if it is sold during the warranty period.

As members of RECC we are required to ensure that should we cease trading, due to receivership, administration or bankruptcy, that the workmanship warranty that we have in place for your installation will still be honoured.

Should we cause any damage, either to installed equipment or to your property we will rectify such damage without charge to you.

Payment Terms	
<u>Deposit:</u> 25% of the total contract value payable on confirmation of order. The deposit may be paid by debit/credit card or BACS.	£
<u>Interim Payment:</u> 35% of the total contract value payable one week prior to the agreed installation start date. The interim payment must be paid by BACS.	£
<u>Final Balance:</u> 40% of the total contract value payable on completion. The final balance must be paid by BACS and received before the handover documentation is sent out.	£

It is important that this quotation is read in conjunction with the full performance estimate that accompanies it. If you require clarification on any point please do not hesitate to contact us

Solar PV Quotation

Customer Confirmation

We/I agree to the Quotation and confirm the order for the products and installation services specified.

We/I agree to the total cost and payment terms set out above. No handover paperwork or certification will be sent until final payment has been received.

We/I have read and agree to abide by the Terms and Conditions of the Contract provided with this Quotation.

By signing this form, you are also confirming that you have received Planning Permission or a Building Warrant for the proposed installation or ascertained that these are not required. Where obtaining the necessary Planning Permission, Building Warrant or other approval is your responsibility and it has not been obtained, you may be responsible for reasonable costs already incurred by us in accordance with this Contract and your statutory rights.

Signature:	{signature:signer1:Please+Sign+Here}
Date :	

Important notes concerning this quotation.

Costing

This quotation has been based on us being able to install your system as described without interruption. Should there be circumstances beyond our control which cause an interruption to the installation process we will discuss with you the implications of such a delay.

Should you decide to make any changes to the agreed installation within your cancellation period, we will produce another full quotation which takes into account these changes. You will be given a further cancellation period to consider this quotation.

Should you wish to make any changes to the agreed installation after your cancellation period has expired, again we will prepare a new quotation for you, but we reserve the right to charge for any reasonable costs we have incurred in working towards the original installation details.

If, during the installation process, we come across any situation that we could not reasonably be expected to foresee, for example, remedial electrical or building work, we will discuss with you the implications and costs involved in rectifying the problem.

Solar PV Quotation

Should you request any changes after the installation process has begun that involve additional cost we will provide you with a quotation based on the daily or hourly rate of our installers. The rate that would apply would be £65 per hour or £450 per day.

Power Cut/Backup Supply

Unless a backup gateway, EPS (Emergency Power Supply) system or other backup solution is specifically included within this quotation, your solar PV and battery system will automatically shut down during a power cut. This is a safety requirement designed to prevent electricity from being exported onto the grid whilst network engineers may be carrying out repairs. As a result, your property will not have power during a grid outage unless a suitable backup system has been specified within this quotation.

Registering for Smart Export Guarantee (SEG)

The [smart export guarantee](#) (SEG) is an obligation set by the government for licensed electricity suppliers to offer a tariff and make payment to small-scale low-carbon generators for electricity exported to the National Grid, providing certain criteria are met.

The SEG is an opportunity for anyone who has installed Solar PV up to a capacity of 5MW.

The SEG Licensee is required to put processes in place to pay for the electricity exported by the eligible installation and to report to Ofgem on installations under the SEG arrangements. SEG Licensees determine the rate they will pay, contract length and other terms.

However, whilst wholesale electricity prices can sometimes fall below zero, SEG Licensees must always offer a tariff that remains above zero. SEG payments must be calculated by SEG Licensees using Export Meter Readings.

We will register your installation on the MCS Installation database and send you the MCS Certificate. You must send your MCS certificate to your chosen licensed electricity supplier in order to receive SEG payments.

Cancellation Rights

Your cancellation rights are set out in full within the Contract and the Notice of Right to Cancel provided with this quotation. Please refer to those documents for details of the applicable cancellation period and how to exercise your right to cancel.

If you wish us to begin work within the cancellation period, you must give us express permission in writing to do so.

Contract Terms

We have enclosed a copy of our contract with this quotation. Please read this carefully, and as always, please contact us if you require further clarification.

Solar PV Quotation

Timetable for works and subcontracting

If you decide to accept our quotation, we will contact you and arrange a mutually agreeable date to begin the installation. We will confirm this with you in writing.

It usually takes us 2 days to carry out an installation. Your installation will usually take place within 4 weeks of receiving your order, subject to workload and availability of materials. We will contact you at the earliest opportunity should there be any delay in obtaining the goods or services required.

We are responsible for ensuring that all subcontracted works are carried out to the standards required by MCS and RECC.

Planning permission

If your property is a listed building or you are in a conservation area you may need planning permission. We will assist you in gaining any permission but you are responsible for contacting your local planning authority to obtain confirmation that planning permission is not required.

We cannot be held responsible for any installations carried out where planning permission was required but not obtained. No refunds will be given in such cases.

Requirements regarding planning permission can vary from area to area.

By signing the Contract, you are confirming that you have obtained any Planning Permission, Building Warrant or other approval required for the proposed installation, or have established that these are not required. Where obtaining such approval is your responsibility and it has not been obtained, we may recover reasonable costs that we have already incurred in accordance with this Contract and your statutory rights.

By signing the Customer Confirmation and Contract, you are confirming the order for the products and installation services specified on this Quotation. This order will become binding when we notify you of its acceptance and will be governed by our installation terms and conditions.

We are a member of the Renewable Energy Consumer Code (RECC) and this document has been prepared in accordance with its Consumer Code. The Consumer Code is available from RECC at www.recc.org.uk.

Deposits and advance payments

We will never ask for more than a 25% deposit, including VAT, on signing of the contract. If we require you to make any advance payments, these will be communicated to you, in writing, with the dates that they are due to

us. These advance payments will never, when added to the deposit, exceed 60% of the total agreed contracted price. We will not ask for any advance payments more than 21 days from the agreed delivery or installation date.

Solar PV Quotation

If we have requested a deposit, this will be held in a holding account as well as any advance payments we may request, so that you can get the work completed or your money back if we cannot deliver your equipment because we have ceased trading.

When you confirm the order and we receive any requested deposit, we will register your name, address and the total value of the contract with our provider. If you are not content for us to register your details in this way, please let us know.

Metering

You'll need to have a smart meter or a meter capable of reporting exports on a half-hourly basis.

Insurance

It is recommended that you inform your property insurers about the proposed installation to check if it will increase your buildings insurance premium.

As members of the Renewable Energy Consumer Code, we must have appropriate insurance to cover possible third-party damage, which may be caused by any of our activities. We are insured by Simply Business.

Data protection

We will keep information about individuals in accordance with data protection legislation. We will not pass information to any third party without your permission. Information about you may be passed to the Renewable Energy Consumer Code administrator and its auditors as part of the Code administrators monitoring of their compliance with the Code. The Code administrator may contact you directly.

Commissioning the system

The installation will be commissioned according to MCS installation standards to ensure that the system is safe, has been installed in accordance with documented procedures and manufacturer's requirements and is operating correctly in accordance with the system design.

Following testing and commissioning, and once final payment has been received, we will provide your Handover Certificate and Handover Pack containing the relevant information about the installed equipment, certification and system performance.

We will also explain the operation and maintenance requirements of the system. A detailed operating manual will be provided as part of the handover documentation.

We will complete the required Building Control and MCS registrations and provide the relevant certificates as part of your handover documentation.

After sales support and maintenance

Solar PV Quotation

If, following installation, the system does not appear to be operating correctly please refer to the operating instructions. We will explain to you, at the handover stage, the safe operation of the system.

If you are still in doubt as to any aspect of the system's operation, please contact us.

We will issue to you, at handover, information as to any maintenance requirements.

We can, should you require it, provide servicing and/or maintenance contracts at additional cost.

RECC and the Renewable Energy Consumer Code

We are a member of RECC, membership number 00076300 and this document is prepared in accordance with the Renewable Energy Consumer Code.

A leaflet describing the Renewable Energy Consumer Code is enclosed with this quotation. The Code can be viewed in full at www.recc.org.uk/scheme/consumer-code

Complaints

We hope you won't have any reason to complain about any aspect of our service. But if you do, please contact us.

You may contact us by telephone, letter or e mail, and you will find our contact details on this quotation. We will acknowledge and attempt to resolve your complaint promptly. Where we need to investigate the complaint, we will report to you our progress on any investigation within seven working days.

If we are unable to resolve your complaint, or you are dissatisfied with our final response, you may be able to refer the matter to Green Homes Dispute Resolution (GHDR), an independent dispute resolution service available to consumers of RECC members. Further information is available at www.ghdr.org.uk.

If you wish to accept the quotation

If you wish to accept the quotation, please read the Contract carefully. If you are in agreement with our terms and conditions, please complete the Customer Confirmation and return it to us together with the signed Contract and your deposit payment if we have requested one. We will then contact you to arrange the date for the installation.

If you have any questions on any aspect of this quotation, the contract or any other related issue please do not hesitate to contact us.

Contract of Sale – for contracts agreed away from trade premises

Should you require either this Contract or any other information we have supplied to you in large print, please contact us.

This Contract has been prepared to comply with all our obligations under the Renewable Energy Consumer Code (RECC) and the Microgeneration Certification Scheme (MCS).

This contract details our obligations to you, and your obligations to us, if there is any point that we can clarify for you, please contact us.

Our main obligation to you is to do the work with all reasonable skill and care according to the standards set by the Microgeneration Certification Scheme (MCS) and according to the timetable set out in the Quote. Under the MCS, only certified companies can enter into a contract with a customer for the sale and installation of a system. Our MCS Certification number is: IAA10125

1. The Quotation

The quotation we have given you (**provided separately**) is valid for 30 days from the date of issue. To confirm your order, you will need to sign this Contract. Once completed, a copy of the signed Contract will be provided to you for your records. No contract will be in place until we confirm acceptance of your order.

Please read these terms carefully before signing them. If you need any explanations about them, please contact us using the address or telephone number provided.

The quotation will document all goods and services we propose to supply, along with the total price for these goods and services including VAT.

We will provide you with a timetable for supplying the goods and carrying out the installation.

The quotation will include information as to the performance of the technology we have proposed to install. These performance estimates will be calculated according to the requirements of the appropriate MCS Standard.

We will discuss with you and provide you with information as to the location of key components. You will be given the opportunity to approve the site designs before work commences.

Where we are unable to supply the main energy generator that was specified in the quotation, we will inform you of this in writing and you will have the right to cancel this contract.

We will advise you on approvals and permissions that may be required for the work; however, it will be your responsibility to ensure that such approvals and permissions are in place. If we require evidence of those permissions (and related drawings and/or specifications) you must make those available.

Additional Payments

If there are additional payments that you may have to make, such as planning costs or if you need to consult a Structural Engineer, we will offer assistance and advice, but you will be responsible for these costs.

Contract of Sale – for contracts agreed away from trade premises

If there is a particular service or item of equipment that would normally be considered as part of the installation and you have requested that this not be included, then we will have documented this on the quotation.

Please take time to acquaint yourself with this contract, if there is anything you do not understand, or if you require clarification on any point, please contact us.

2. Right to cancel

Your rights under this contract

You have the right to cancel this contract during the 'cancellation period' without giving any reason.

The cancellation period lasts 14 days and will start on the day the contract is signed by you.

To exercise the right to cancel, you must inform us of your decision to cancel this contract by a clear statement (e.g. a letter sent by post, fax or e-mail). You may use the Cancellation Form we have supplied but it is not obligatory.

To meet the cancellation deadline, it is sufficient for you to send your communication concerning your exercise of the right to cancel before the cancellation period has expired.

You may also cancel this contract if there is an unreasonable delay in the installation being carried out, if this has not been caused by you. You would also be entitled to a full refund if that delay has been caused by something outside of our direct control but not caused by you.

If you cancel this contract outside the cancellation period you may have to pay to us reasonable costs for any losses we may have incurred. We will attempt to keep these costs to a minimum. If you have paid us a deposit or any advance payments we may retain all or part of these payments as a contribution.

You will be entitled to cancel this contract if there is a serious delay in our ability to carry out the agreed work that is outside of your control, but within our control. You will be entitled to a full refund.

If the final design or the main Energy Generator differs from what is outlined in the quotation, you are entitled to cancel the contract. You are also entitled to cancel the contract if, due to price increases in products, the total cost of this contract increases between initial signing and the payment schedule being introduced.

If we are in serious breach of our obligations as detailed in this contract then you will be entitled to cancel this contract, request a repair or replacement or you may be entitled to request compensation.

3. Effects of cancellation

4. If you cancel this contract, we will reimburse to you all payments received, including the costs of delivery (except for the supplementary costs arising if you chose a type of delivery other than the least expensive type of standard delivery offered by us).

Contract of Sale – for contracts agreed away from trade premises

We may make a deduction from the reimbursement for loss in value of any goods supplied, if the loss is a result of unnecessary handling by you.

We will make the reimbursement without undue delay, and not later than:

- a) 14 days after the day we receive back from you any goods supplied, or
- b) (if earlier) 14 days after the day you provide evidence that you have returned the goods, or
- c) If there were no goods supplied, 14 days after the day on which we are informed about your decision to cancel this contract.

We will make the reimbursement using the same means of payment as you used for the initial transaction, unless you have expressly agreed otherwise; in any event, you will not incur any fees as a result of the reimbursement.

We will collect the goods at our expense. You are only liable for any diminished value of the goods resulting from the handling other than what is necessary to establish the nature, characteristics and functioning of the goods.

4. Work begun prior to the expiry of the cancellation period

If you have agreed in writing that installation work will commence before the cancellation period expires, and you subsequently cancel in accordance with your rights, you are advised that reasonable payment may be due for any work carried out. You must confirm in writing that work may commence before your cancellation period expires.

You will be entitled to cancel this contract if there is a serious delay in our ability to carry out the agreed work that is outside of your control, but within our control. You will be entitled to a full refund.

If we are in serious breach of our obligations as detailed in this contract then you will be entitled to cancel this contract, request a repair or replacement or you may be entitled to request compensation.

You can only recourse to these actions if the goods or services are incorrectly described or not fit for purpose. You will not be entitled to seek these remedies if you have changed your mind about the goods and services agreed to outside of any required cancellation periods.

5. Related credit and other agreements

If you decide to cancel your contract for our goods and services, then any credit agreement and any other ancillary contracts related to the main contract will be automatically cancelled.

6. Our rights under this contract

If, within fourteen days of us informing you in writing of a serious breach of your obligations to us you have failed to rectify this breach, we will have the right to cancel this contract.

Contract of Sale – for contracts agreed away from trade premises

Should we suffer any losses due to a breach of this contract then we will be entitled to reasonable compensation to cover these losses. We are required to attempt to keep all losses to a minimum.

7. Timetable for works

We will have agreed with you a timetable for carrying out the installation. By signing this contract, you are confirming that you agree with this timetable.

There can be occasions that this timetable may need to be varied, due to, for example, poor weather or unavailability of goods and services. We will inform you of any delay we become aware of at the earliest possible opportunity. We would then arrange a new mutually agreeable timetable.

In the case of severe delays to the delivery of goods then you may be offered different products of equivalent specification, value and quality, so long as they are MCS certified. You can either accept that offer, wait for the products you ordered or choose to cancel the contract without penalty.

Should the delay be caused by us, or by our suppliers, and that delay could be considered as severe by a reasonable person, you would be entitled to cancel this contract without penalty to you.

Should the delay be caused by you, we will attempt to accommodate that delay without cost to you. However, if the delay incurs us in extra costs, for example scaffolding, we will require that you cover these costs.

8. The Installation

The installation will be carried out strictly in line with the MIS Standard relevant to the technology, and to any document referred to within that standard. In addition, we will ensure at all times that we meet all our obligations under the RECC Consumer Code.

The goods we supply will be of satisfactory quality and fit for the purpose. They will operate as we have described to you.

We will have insurances in place which will cover any loss or damage caused by us or our agents.

You will be required to supply to us normal services free of charge; this would include toilet, washing, water facilities and electricity. You should also ensure we have safe and easy access to the installation area and if required, the password to your Wi-Fi.

Existing Electrical Installation and Earthing

As part of our standard installation process, we will normally install a dedicated consumer unit for the new renewable energy system and connect this into the existing electrical supply.

Simple Solar (SW) Ltd cannot accept responsibility for faults, defects or non-compliance that already exist within the property's electrical installation. This includes, but is not limited to, circuit faults, insufficient electrical capacity, obsolete wiring, non-compliant distribution equipment or inadequate earthing arrangements.

If any existing issue prevents us from safely completing or certifying the installation, we will discuss this with you. Any additional fault-finding or remedial work required will be quoted separately before being carried out.

Contract of Sale – for contracts agreed away from trade premises

DNO Applications

By signing this Contract, you authorise Simple Solar (SW) Ltd to act on your behalf in preparing and submitting any required Distribution Network Operator application or notification relating to the installation. DNO processing times are outside our control and may affect when grid connection confirmation is received or when you are able to register for the Smart Export Guarantee.

Emergency Backup Supply

Where a backup system is included within the quotation, the circuits and power available during a grid outage will depend on the backup arrangement specified. Existing electrical faults affecting circuits intended for backup may need to be rectified before those circuits can be connected. Any additional remedial work will be agreed and quoted separately.

System Monitoring and Connectivity

The monitoring functions of the solar and/or battery system require a suitable internet connection. Where reliable Wi-Fi is not available at the equipment location, a compatible 4G dongle may be offered as an optional upgrade. Where selected, the additional cost will be added to your invoice.

Scaffolding and Site Safety

Customers, visitors and other third parties must not climb, access, move or interfere with scaffolding, ladders or work platforms provided for the installation. These are for use by trained and authorised personnel only. You are responsible for ensuring that anyone under your control complies with this requirement.

Any work to prepare for the installation, carried out by you or a third party that you employ should be carried out in line with the agreed start date for the installation. If this work has not been completed and a consequent delay is caused you may be liable for any costs incurred by us for such a delay.

The work will be carried out by personnel trained in each of the tasks they are assigned.

You will be given warranties for both the installation itself and for the installed goods. The terms of these warranties will be given to you in writing and we will explain them to you verbally.

Following completion of the installation and receipt of the final payment, we will provide the documentation required under the applicable Microgeneration Installation Standard within the relevant handover timescale.

9. Deposits, advance payments and goods purchased with deposits and advance payments

Any deposits and advance payments that you make to us can only be used to carry out work under this contract.

We are required under the Renewable Energy Consumer Code to protect any deposits and advance payments you make to us, as well as the Workmanship Warranty, with an insurance policy. We will give to you the name and contact details of this insurance company with the quotation. You will be entitled to claim on this policy should we fall into receivership, bankruptcy or administration.

Contract of Sale – for contracts agreed away from trade premises

When we purchase goods for use under this contract the legal title to those goods or the proportion of which you have paid us for will pass to you. We will either deliver them to you or we will store them for you and mark them as your property. They will be kept separate from other goods. We will ensure that these goods are insured until they are delivered to you. You may make arrangements to inspect the goods or to remove them from our premises if you wish.

If we have requested a deposit, then this deposit will not exceed 25% of the total contract price set out in the quotation. Should you decide to cancel this contract within the cancellation period, then this deposit will be returned to you promptly.

If we have requested advance payments in addition to a deposit, the total of all advance payments and deposits will not exceed 60% of the total contract price.

We will not request advance payments to be made any more than 3 weeks from the agreed delivery or installation date.

If we have requested a deposit before a full technical assessment of your property has been made, and we are unable to proceed because of something discovered during that technical inspection, then any deposits or advance payments will be returned.

The quotation will set out in detail when invoices will be sent and the amounts due for each payment.

The deposit may be paid by debit/credit card or BACS. Any interim payment and the final balance must be paid by BACS in accordance with the payment schedule set out in the Quotation.

10. Goods belonging to us

Any goods belonging to us that have been delivered to you should remain clearly identifiable as our property. Until the title to the goods is transferred to you the goods should be stored in such a way as they are protected from damage. They should be kept in their original packaging. Should you fear for the safety of the goods in any way, or you feel that the goods are causing any form of hazard you should contact us.

Where products and materials are delivered to, or stored at, the installation site you, the customer, shall not be liable for inspection, storage or handling of those goods. This does not preclude us asking you to check the goods received for any visible damage, and to ensure they are correct.

Should you terminate the contract for any reason, then we will make arrangements with you to collect the goods. If this happens then we will reimburse you if any of your money was used to purchase a proportion of the goods. If you do not make adequate and reasonable arrangements with us to allow the goods to be collected, we retain the right to take legal proceedings to recover the goods or their value. The amount of any reimbursement may be reduced by any reasonable costs we may have incurred.

Contract of Sale – for contracts agreed away from trade premises

11. Changes to the planned work

If you decide to make changes to any planned work after you have signed this contract you should contact us without delay. Wherever possible we will incorporate your changes and if we are not able to do so we will inform you as to why it is not possible for us to do so.

Where we are able to agree to your changes, we will require that you set out, in writing and within fourteen days, confirmation of your request.

You need to be aware that any changes to the original design may mean an adjustment to the cost of the installation. Any adjustment in the cost, either in addition or subtraction will be dealt with as a Variation of Contract and we will adjust the price by written agreement with you. You are also entitled to cancel the contract if there are changes in the original design or if the main Energy Generator differs to that in the quotation, as outlined in clause 2 of this contract.

There can be occasions when we come across unexpected work. Should this arise, we will discuss this with you. If it is an area of work in which we are competent to operate, we will issue you with a quotation to complete that work. We will have documented on the quotation the normal rate for the work of our installers. If the work is outside our area of competence, we will assist you in finding a suitably qualified contractor to carry out the work. If this unexpected work causes a delay in the installation process, we may need to make reasonable charges for this delay.

12. Late payment

You should make the payments agreed on the quotation as they become due. The final payment will be due on completion of the installation. If you fail to make any agreed payment we may cease work. If you fail to pay the amount specified in an invoice sent to you by the agreed due date, then we reserve the right to charge you interest until you pay the amount due. The interest rate we will charge will be 3% above the Bank of England base rate.

It is not permissible under this contract to withhold any more than a proportionate amount of the outstanding balance for any alleged defect. If you do withhold any amount after a payment has become due, you should give us notice of your

intention before the final date on which payment is due. You should also, with that notice, state the reasons for withholding payment.

If we intend to cease work, we will give you notice of this in writing.

If you are in breach of this contract because you have not made a payment that was due to us and we have ceased work, you may have to compensate us for any additional costs we have incurred.

Dependent on the circumstances, we may require that the goods are returned to us. If necessary, we will take legal proceedings to recover the goods or/and any outstanding amounts due to us.

Contract of Sale – for contracts agreed away from trade premises

13. Mediation and arbitration

If you have a complaint about any aspect of the goods or services we have provided, please contact us in the first instance so that we have the opportunity to resolve the matter.

We will record your complaint, investigate it and provide you with a clear response. We will aim to resolve complaints promptly and will report our findings to you within the timescales required by the Renewable Energy Consumer Code.

If we are unable to resolve your complaint, or you are dissatisfied with our final response, you may refer the matter to Green Homes Dispute Resolution (GHDR), an independent dispute resolution service available to consumers of RECC members.

Green Homes Dispute Resolution can be contacted at:

Website: www.ghdr.org.uk

Telephone: 0204 616 0015

Email: hello@ghdr.org.uk

We will cooperate with the applicable dispute resolution process in accordance with our obligations under the Renewable Energy Consumer Code.

Disputes relating specifically to the MCS Installer Standards may also be referred to our MCS Certification Body. We will provide their contact details on request.

Solar PV Performance Estimate

Project Reference:	
Installation Address:	
Survey carried out by:	
Date of survey:	

The Microgeneration Certification Scheme (MCS) requires us to provide to the customer a performance estimate based on the standard procedure set out in the Microgeneration Installer Standard for Solar Photovoltaic systems – [MIS 3002](#).

When examining this performance estimate you need to be aware of the following disclaimer that we are required to issue to you:

Important Note: The performance of solar PV systems is impossible to predict with certainty due to the variability in the amount of solar radiation (sunlight) from location to location and from year to year. This estimate is based upon the standard MCS procedure, given as guidance only for the first year of generation. It should not be considered as a guarantee of performance.

The solar PV self-consumption has been calculated in accordance with the most relevant methodology for your system. There are a number of external factors that can have a significant effect on the amount of energy that is self-consumed so this figure should not be considered as a guarantee of the amount of energy that will be self-consumed.

Where the shade factor (SF) is less than 1 (i.e. shading is present) the following additional note shall accompany the above Important Note:

Where the MCS methodology is used:

Shading will be present on your system that will reduce its output to the factor stated. This factor was calculated using the MCS shading methodology and we believe that this will yield results within 10% of the actual energy estimate for most systems.

Where another methodology is used:

Shading will be present on your system that will reduce its output to the factor stated. This factor was NOT calculated using the MCS shading methodology, but we can confirm that the system as quoted, taking into account the shading present, will deliver at least 90% of the energy (in kWh) as set out in this performance estimate.

Solar PV Performance Estimate

Where the site has been evaluated remotely, the following additional note shall accompany the above important note:

This system performance calculation has been undertaken using estimated values for array orientation, inclination or shading. Actual performance may be significantly lower or higher if the characteristics of the installed system vary from the estimated values.

A. Installation Data		
Installed capacity of PV system – kWp (stc)		kWp
Orientation of the system – degrees from south:		degrees
Inclination of system – degrees from horizontal:		degrees
Postcode region		
B. Performance Calculations		
Radiation (Kk) from table		kWh/kWp
Shade Factor (SF)		
Estimated annual output (kWp x kWh x SF)		kWh
C. Estimated PV self-consumption		
Assumed occupancy archetype		
Assumed annual electricity consumption		kWh
Assumed annual electricity generation from solar PV system		kWh
Expected solar self-consumption		kWh
Grid electricity independence / Self-sufficiency		%
Battery size		kWh

Solar PV Performance Estimate

The Figures

If the system performs in line with our predictions the following would apply, remember, we have assumed that you are - . We have assumed you will **self-consume** % of the energy produced by your PV system, as determined by the method set out in MGD 003, therefore **exporting** %.

<u>Annual Benefits</u>		
Grid independence: Estimated annual electricity savings in year 1	£	per year
Annual income generated from Smart Export Guarantee in year 1	£	per year

Note: Smart Export Guarantee rates differ between energy providers and can change at their discretion. Please also be aware there is no current set minimum number of years of eligibility for the Smart Export Guarantee. The amount above is per annum based on your energy provider's current SEG rates.

Payback Period

<u>How long will it take for the System to pay for itself?</u>	
None of us can predict accurately what will happen in the future when it comes to inflation and electricity prices, so for the payback time we have assumed an increase of 7% in electricity prices. This is only a rough guide, as there may be maintenance costs to be considered.	
Total installation cost	£
Estimated annual benefit in year 1	£
Accumulated benefit over 30 years	£
Return on investment in year 1	%

Notice of Right to Cancel

Simple Solar (SW) Ltd t/a Simple Solar
1A Foley Lodge
Chittleburn Business Park
Plymouth
PL8 2PH

ISSUE DATE:

Your contact with us for this contract is:

Notice of Right to Cancel the Contract

Customer Cancellation Rights

You have the right to cancel, if you wish, within fourteen days of you signing the Contract.

Cancellation should be communicated by e-mail to: info@simplesolarltd.co.uk

Simple Solar (SW) Ltd – info@simplesolarltd.co.uk

The Cancellation Notice form on Page 2 overleaf may be used to exercise this right and can be delivered in person, by email or sent by post – in which case you should obtain a Certificate of Posting or Recorded Delivery slip. You are advised to take a copy of the cancellation notice before returning it to us. Your cancellation is deemed to have been served as soon as it is delivered in person, posted, or, if you have sent an email, from the day the email is sent to us.

Work begun prior to the expiry of the Cancellation Period

If you have agreed in writing that work will commence before the fourteen day cancellation period expires, and you subsequently cancel in accordance with your rights, you are advised that reasonable payment may be due for any work carried out. You must confirm in writing that work may commence before your cancellation period expires. You can use the form on Page 3 of this document to do this.

Notice of Right to Cancel

Cancellation Notice

(Complete, detach and return this portion of the form **ONLY IF YOU WISH TO CANCEL THE CONTRACT**)

Notice of Right to Cancel

Work Commencing Prior to the Expiry of the Cancellation Period

If you wish us to start work before the Cancellation Period expires, you should sign below to confirm this agreement.

You need to be aware that if you decide to cancel within fourteen days, reasonable payment may be due for any work already carried out prior to cancellation.

I/We (delete as appropriate) agree that work may commence on, before my cancellation period has expired.

I understand that if I decide to cancel within fourteen days, I may be asked to pay reasonable costs for any work that has been carried out prior to my cancellation.
